

## Transit and Transportation Recommendations

### Improve bus service on selected lines

Implement infrastructure changes along high-volume bus routes 7, 32, and 48 to meet transit demand and reduce travel times. Potential upgrades include transit signal prioritization and dedicated rights-of-way.

### Improve and expand Route 15 trolley service

Improve and expand Route 15 trolley service through the following enhancement projects:

- Identify and construct a turnaround location in the vicinity of Girard College to allow short-turning vehicles for more frequent service on the most-traveled section of the line
- Eliminate left turn lanes where feasible to expand the route's separated Right-of-Way
- Study options for retaining service on the Frankford Avenue branch while restoring service to Port Richmond, including the procurement of more vehicles or modified scheduling
- Pilot stop consolidations based on ridership and access and make successful pilots permanent

### Implement recommendations of the Pedestrian and Bicycle Plan.

Image source: Bicycle Coalition of Greater Philadelphia

Implement the following priority recommendations of the Pedestrian and Bicycle Plan:

- Install a bike lane on 2nd Street
- Install market shared lanes on 5th Street and Cecil B Moore Avenue
- Install appropriate infrastructure for safer travel at the approaches to the Girard Avenue and Strawberry Mansion Bridges
